Technical Skills / Achievements

Frameworks: Spring, Spring Boot, REST APIs, JPA, JWT, OAuth, Hibernate, Spring Security

Languages: Java, C++

Cloud Technologies: AWS (IAM, VPC), Kubernetes, Docker

Monitoring/CI/CD Tools: Grafana, Prometheus, Jenkins, Kafka, Redis

Developer Tools: VS Code, Git/GitHub, Maven, IntelliJ, Postman

Solved **400+** problems on Data Structures and Algorithms on **LeetCode** and **GFG**

Experience

Microsoft | *Software Engineer (Java, SpringBoot, Kafka, PostgreSQL, Docker)* November 2025 – Present

- Part of Storage team, ensuring data is highly reliable, consistent, ensuring zero downtime.

Target | *Software Engineer (Java, SpringBoot, Kafka, PostgreSQL, Docker)* Sept 2024 – Nov 2025

- Resolved critical **JVM heap memory** issues by tuning heap sizes, GC parameters, and analyzing memory leaks, leading to a **99% improvement** in heap utilization and an **80% reduction** in total GC time.
- Developed RESTful APIs using Spring Boot achieving **20% faster response times** by optimizing database queries and leveraging asynchronous processing for non-blocking operations.
- Built a robust deployment pipeline by writing **Dockerfiles** and implementing **CI/CD pipelines**, reducing deployment time by **30%**.
- Solved the **dual-write consistency** problem using the **Transactional Outbox Pattern**, ensuring **100% consistency** between service databases and Kafka topics.
- Handled **distributed transactions** using the **Saga Pattern**, achieving eventual consistency across services with zero manual intervention during failure scenarios.
- Deployed **Redis caching** to optimize API performance, resulting in a **25% reduction** in latency and significantly decreased response time.

Sprinklr | *Associate Cloud Developer (Java, SpringBoot, PostgreSQL, JWT)* July 2023 – Aug 2024

- Contributed to creation of RESTful services using Spring Boot to integrate multiple data sources for real-time credit score evaluation and predictive analytics, significantly improving system scalability and efficiency.
- Collaborated with team members to enhance system security by implementing **JWT (JSON Web Token)** authentication and authorization measures, ensuring secure access to system resources by **10%**.
- Worked on implementing **Pagination** and **Sorting** functionalities within API endpoints, enhancing efficiency and user experience by **10%**.

Sprinklr | *Associate DevOps Intern (Kubernetes, Docker, Jenkins, Prometheus)* January 2023 – June 2023

- Successfully set up continuous integration and continuous deployment (**CI/CD**) pipelines for multiple environments using Jenkins, streamlining development workflows by **20%**.
- Established **PV and PVC** provisioning utilizing storage classes, ensuring **100% data persistence**.
- Automated Kubernetes cluster security using **Kyverno policy generator**.
- Implemented **RBAC (Role-Based Access Control)** to enforce proper security measures by **10%**.

Projects

ThreadBoost | (*SpringBoot, ThreadPool, RestAPI*) | GitHub

- Created a Spring Boot application to illustrate the effectiveness of **non-blocking architecture** using a **ThreadPool**, showcasing the differences between **blocking and non-blocking architectures**.
- Achieved notable performance enhancements: read operations saw a reduction in response time, **CRUD operations experienced a 95.6% improvement**, and file read/write operations showed an **85% increase in efficiency**.

Education

MS Ramaiah Institute of Technology

Sep 2019 – May 2023

Bachelor of Engineering GPA: 8/10
